

Napoli, 24 September 2021

Dear Customer,

ALA SpA , as a supplier of chemical substances and articles, confirms its duty to comply with the European Community Regulation on chemicals and their safe use (EC 1907/2006) concerning the Registration, Evaluation, Authorization and Restriction of Chemical substances ("REACH Regulation") and is aware that has to provide respective information for only those products, which has been imported and distributed by ALA into or within the European Economic Area (EEA).

ALA is not a manufacturer of chemical substances or articles as defined in the REACH regulation, therefore it's the manufacturer's responsibility to provide us the information for substances, mixtures and articles containing any toxic or hazardous ingredients.

ALA will duly inform our customers when an Article contains greater than 0.1% weight on weight of an SVHC as per the requirements of REACH (1907/2006/CE) dated 08 July 2021 (<https://echa.europa.eu/candidate-list-table>).

Moreover, for all the products where the manufacturer has provided a proper REACH Declaration (wether the product contains or not any SVHC), this information will be automatically printed on our Packing Slip.

With this system ALA ensures its duty of communication as mentioned within Art 33 REACH.

As we do not have all information from all our mfr yet, we still have a lack of data we are currently working on.

We consistently evaluate our hardware portfolios in order to get the respective safety, health and environmental information in accordance to Art.33 REACH.

Unfortunately we do not receive yet such information to all parts from our supplier.

We remain at your disposal for further information.
